## WHAT WE DO

### Design, commission, and deliver... on-line-interactive assessments

Key to the integrity of the assessment process is to host experienced Service Providers who moderate Students' formative and summative assessment materials.

Teachers and Parents access this information to evaluate the Students' participation and success though out the course. This is achieved using plugins that report results in a visual interface. The education experience becomes transparent and accountable.

Teachers and Publishers are invited to contribute to and, host courses on the oli.college portal. Teachers associated with registered Service Providers moderate Students' work and provide formative feedback. Teaching can now earn you the rewards that you deserve.

STUDENTS ENGAGE IN AN EDUCATION THAT IS MEANINGFUL.

## SOCIAL MEDIA INTEGRATION

Yes, you can engage with your community either privately or publicly. Integrate to your Facebook account. Here are the main features:

As a member you can join and/or create groups. Groups can be open to all members or remain private. Group members can hold discussions.

Facebook-like app for students and teachers support the teaching and learning process.

Register for free and join a community of learners who are sharing a similar experience without all the distraction of conventional social media platforms.

AS A PAID- UP MEMBER JOIN TEACHER ADMINISTERED GROUPS FOR SUBJECT SUPPORT.

## OBJECTIVE

### Our key objective is 'keep it real' in a digital world.

We aim to achieve this by ensuring feedback is quick, meaningful, and accurate.

Continuous assessment through lesson quizzes provide immediate feedback.

Teacher feedback gives insight as to how you are progressing through your material.

Engage with other learners.

## COMPLIANCY FOR HOMESCHOOLERS

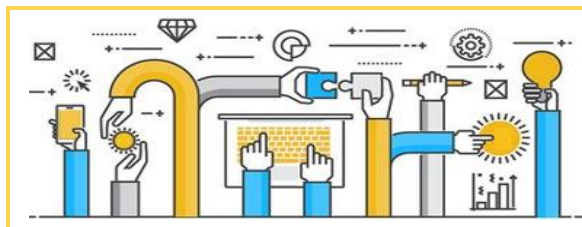

Progression through the grades is easy when assessment is conducted through registered learning institutions.

Valid reporting structures mean that learners can integrate into new learning environments confident that they are placed in the correct grade.

Future legislation will require that all learners are assessed by competent assessors. The oLi.college platform opens the door to forming relationships between institutions and learners.

## TEACHER INTERFACE

The Open Learning Initiative (oLi) is primarily aimed at:

- learning institutions who want to support their learners with tech savvy solutions;
- teachers who want to contribute to an expanding digital resource;
- learners who want to engage in education that is dynamic;
- parents who want to support educational outcomes.

oLi serves the teaching and learning environment working hand-in-hand with the teacher to deliver, assess, record, flip the classroom, accelerate, remediate. With oLi, class time can be used far more effectively.

The technology used is configured to provide relevant, media-rich content whilst allowing for automated assessments which give immediate feedback and marked assignments to meet the reporting requirements of various stakeholders.

Teachers click here to register NOW!

Registration is simple.  
 Registration is free.

Once your application is approved you can create courses, start loading your content and develop quizzes. You can also request to link to other teacher's resources and share your own. Administer groups through the social interface. This is done through a user-friendly interface.

You will be issued a promo-code which will allow your students and parents to register for your courses. This is FREE.

oli.college only charges commissions for users registered on monetised courses and sales of course content.
